

Safety Bulletin 30mm x 2mm Axles

Issued: 30th August 2005

Competitors that have karts fitted with this type thin wall axle should be aware that some of these thin wall axles have failed. It is strongly recommended in the interest of safety by the AKA that they be replaced immediately with the recommended axles described on the table below before the mandatory regulation comes into force.

Effective from 1st November 2005

As from the 1st November 2005 rear 30mm axles will have a minimum wall thickness at all points of 3mm except in keyways and chamfers (maximum chamfers will be 3mm)

Effective from the 1st January 2006

Rear axles the maximum external diameter is 50mm the minimum will be 25mm with a minimum wall thickness at all points as laid out in the table below, except in keyways and the chamfers (maximum chamfers will be 3mm)

50mm	1.9mm
40mm	2.9mm
35mm	3.0mm
30mm	3.0mm
< 30mm	full
